

NOT FOR WOMEN ONLY

WOMEN IN SCIENCE

This is a new course designed to analyze the historical evolution of women's participation in scientific pursuits.

What makes a scientist? The sociological and psychological factors behind scientific achievement? Are there sex differences in scientific aptitude? Is the personality profile of the eminent male scientist different from the profile of the eminent female scientist?

Students in science, history and the social sciences will find this course particularly relevant.

<u>Inte 493B-01</u>	<u>Tuesday, Thursday</u>	<u>9-10:15 a.m.</u>
	<u>Room AD-312</u>	<u>3 credits</u>
